The Inverter Welding Power Source TIG dp 181H developed by STEL concentrates excellent weld performance in both DC TIG welding with high frequency ignition, and Stick-electrode welding, The newly engineered design has resulted in a portable lightweight DC TIG machine of compact dimensions.

The advanced technology of the powerful microprocessor results in a perfect arc ignition every time.

MAIN FEATURES

DIGITAL DISPLAY

Digital Display for a clear and easy reading of the parameters at any time.

HIGH FREQUENCY

HF (High Frequency) ignition, slope up and slope down adjustment (from 0 to 10s) for a perfect crater filler.

DC PULSING

In addition to the many functions featured, the operator is also able to TIG PULSE resulting in optimum arc formation with regulated and lower heat input, ideal for welding thin gauge materials.

ARC FORCE/HOT START

In STICK Mode you can use:

- Hot Start 0/50% of the Welding Current.
- Arc Force 0/50% of the Welding Current.

PRINCIPLE FEATURES

Principal features include: TIG DC welding (2T, 4T), Pulsing, pre-gas and post-gas time adjustment, variable slope up and down, Tig lift, digital display of all welding parameters, low energy consumption, VRD, TIG Torch with up/down regulation.
